Hips

Product code: B-1802

Design: Pawlak & Stawarski

The Hips collection is a series of seats designed for modern restaurants, food courts and modern home interiors. The collection made entirely of variable thickness plywood is a combination of contemporary elegant design with advanced wood bending technology. The change in thickness used in the seat and legs adds lightness to the form – emphasizing the thin edges of the plywood – and at the same time provides a strong construction. The soft and smooth lines of the Hips seat create a subtly organic, modern and friendly form. The Hips collection is available in several versions: without upholstery, with an upholstered seat or fully upholstered.
